As an applied mathematician, I have had exposure to algorithm & web development, UI/UX design, data science towards social impact, and contributed to the modeling of dynamics of oceanic currents. My goal is to continue to diversify my knowledge and make an impact on the world around us.

EXPERIENCE

DEC 2021 TO PRESENT

SOFTWARE DEVELOPMENT ENGINEER, ONE IDENTITY, GMBH

- Support web migration to an Angular framework while extending middle-ware REST API with C#
- Communicate with stakeholders to architect accessible UI/UX for data visualization and interactivity and deploy as stand-alone demos
- Identify, motivate, and solve technical debt in testing and UI inconsistencies

DEC. 2018 TO AUG 2021

RESEARCH SCIENTIST, 908 DEVICES INC.

- Automated intact protein characterization via deconvolution, relative identification, and quantization with CE-MS data in Python and C++
- Managed the above tool for both internal and external software deployment
- Maintained and added significant features to existing MATLAB/embedded software
- Reported sample analyses to customers and worked together with lab technicians and chemists to design and run experiments
- Formed large scale data analyses on manufacturing and unit exit test data

MAY 2018 TO SEPT 2018

RESEARCH SCIENTIST, DATA SCIENCE FOR SOCIAL GOOD

- Led development of a data analysis tool to bring together multiple data streams via R and make statistical inference
- Collaborated with stakeholders to ensure requirements were met
- Partnered with Microsoft to gain insight into algorithms and analysis avenues
